Summary Section

Investment Objective

The investment objective of the Convergence Long/Short Equity ETF (the “Fund”) is to seek long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund (“Shares”). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.95%
Other Expenses	0.00%
Dividends and Interest on Short Positions ⁽¹⁾	0.30%
Total Annual Fund Operating Expenses ⁽²⁾	1.25%

⁽¹⁾ “Dividends and Interest on Short Positions” reflect interest expense and dividends paid on borrowed securities. Interest expenses result from the Fund’s use of prime brokerage arrangements to execute short sales. Dividends paid on borrowed securities are an expense of short sales. These expenses are required to be treated as a Fund expense for accounting purposes and are not payable to Convergence Investment Partners, LLC (the “Adviser”). Any interest expense amount or dividends paid on securities sold short will vary based on the Fund’s use of those investments as an investment strategy best suited to seek the investment objective of the Fund.

⁽²⁾ “Total Annual Fund Operating Expenses” does not correlate to the “Ratio of Expenses to Average Net Assets” in the “Financial Highlights” section of the prospectus because “Total Annual Fund Operating Expenses” reflect the current unitary management fee structure of the Fund.

Example

This Example is intended to help you compare the costs of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$127	\$397	\$686	\$1,511

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These transaction costs and potentially higher taxes, which are not reflected in the Total Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 244.44% of the average value of its portfolio.

Principal Investment Strategies

The Fund seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its net assets (plus any borrowings for investment purposes) in long and short positions in equity securities of domestic companies. The Fund focuses primarily on companies with medium and large market capitalizations, although the Fund may establish long and short positions in companies of any market capitalization. The Fund will hold long (purchase) securities that the Adviser believes will outperform the market, and will sell short securities expected to underperform the market.

The Fund intends to maintain a net long exposure (the market value of long positions minus the market value of short positions) of approximately 50% to 100%. Under normal market conditions, the Fund's long positions may range from approximately 90% to 150% and its short positions may range from approximately 20% to 70%.

In making investment decisions for the Fund, the Adviser utilizes a proprietary stock ranking process. This stock ranking process is based on the philosophy that fundamentally sound companies are rewarded while fundamentally inferior companies are punished. Additionally, this process was designed to capture the best attributes of both quantitative and fundamental methods. Unlike traditional fundamental stock picking, quantitative management allows for broader coverage and increased data utilization. The Adviser seeks to maximize return while minimizing the risk assumed by the Fund through a stock ranking process that measures what market participants are rewarding or punishing. The Adviser systematically measures both current factor exposures for company stocks and the market's factor preferences and tilts the Fund's investment portfolio towards stocks that are ranked highly by the Adviser from a fundamental perspective. The factors the Adviser evaluates as part of its stock ranking process include, but are not limited to, valuation, growth, momentum, and quality.

- Valuation factors help to identify stocks that appear inexpensive relative to other companies based on fundamental measures. The Adviser evaluates valuation factors such as price-to-value ratios, earnings, enterprise value, cash flow, revenues, and yield.
- Growth factors seek to identify stocks that exhibit signs of higher-than-average growth metrics. The Adviser evaluates growth factors such as the growth rates in company earnings, revenue, and cash flow, in addition to assessing the rate of change of these growth rates.
- Momentum factors quantify trends in both price and fundamentals. The Adviser evaluates momentum factors such as the strength and duration of stock price movements, as well as fundamental trends in a company's cash flow, earnings, and sales.
- Quality factors differentiate companies based on a variety of corporate health and stability measures. The Adviser evaluates quality factors such as the stability of a company's earnings and cash flow, the strength of the balance sheet, and profit margins.

The Adviser aggregates similar measures into factors and each measure is equally weighted. The Adviser's buy and sell decisions are primarily driven by this investment process. Applying these indicators, the Adviser takes long or short positions in stocks that it believes are favorably ranked.

Principal Risks

Before investing in the Fund, you should carefully consider your own investment goals, the amount of time you are willing to leave your money invested, and the amount of risk you are willing to take. Remember, in addition to possibly not achieving your investment goals, **you could lose all or a portion of your investment in the Fund over long or even short periods of time.** An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The principal risks of investing in the Fund are:

- *General Market Risk.* Certain securities selected for the Fund's portfolio may be worth less than the price originally paid for them, or less than they were worth at an earlier time.
- *Short Sales Risk.* The value of a security sold short may increase prior to the scheduled delivery date, and because the market price of the security sold short could increase without limit, the Fund could be subject to a theoretically unlimited loss.

- *Management Risk.* Investment strategies employed by the Adviser in selecting investments and asset allocations for the Fund may not result in an increase in the value of your investment or in overall performance equal to other investments.
- *ETF Risk.* The Fund is an ETF and, as a result of an ETF's structure, it is exposed to the following risks:
 - *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as Authorized Participants ("APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
 - *Cash Redemption Risk.* The Fund's investment strategy may require it to redeem Shares for cash or to otherwise include cash as part of its redemption proceeds. The Fund may be required to sell or unwind portfolio investments to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to realize a capital gain that it might not have realized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used. To the extent that the transaction fees charged for redemptions of creation units is insufficient to cover the Fund's transaction costs of selling portfolio securities, the Fund's performance equal to other investments could be negatively impacted.
 - *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
 - *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. As a result, investors in the Fund may pay significantly more or receive significantly less for Shares than the Fund's NAV. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant. Such conditions may also cause the bid/ask spreads for an ETF to widen.
 - *Trading.* Although Shares are listed for trading on the Cboe BZX Exchange, Inc. (the "Exchange") and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares. This could lead to an increase in the bid/ask spread for the Shares or the shares trading at a price that is higher or lower than the Fund's NAV.
- *Recent Market Events Risk.* U.S. and international markets have experienced significant periods of volatility in recent months and years due to a number of economic, political and global macro factors including rising inflation and the impact of the coronavirus (COVID-19) as a global pandemic, uncertainties regarding interest rates, rising inflation, trade tensions, and the threat of tariffs imposed by

the U.S. and other countries. The recovery from COVID-19 is proceeding at slower than expected rates and may last for a prolonged period of time. As a result of continuing political tensions and armed conflicts, including the war between Ukraine and Russia, the U.S. and the European Union imposed sanctions on certain Russian individuals and companies, including certain financial institutions, and have limited certain exports and imports to and from Russia. The war has contributed to recent market volatility and may continue to do so. Continuing market volatility as a result of recent market conditions or other events may have an adverse effect on the performance of the Fund.

- *Common Stock Risk.* Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change.
- *Large-Capitalization Company Risk.* Larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in consumer tastes or innovative smaller competitors. Also, large-capitalization companies are sometimes unable to attain the high growth rates of successful, smaller companies, especially during extended periods of economic expansion.
- *Medium-Capitalization Company Risk.* Medium-capitalization companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, these mid-sized companies may pose additional risks, including liquidity risk, because these companies tend to have limited product lines, markets and financial resources, and may depend upon a relatively small management group. Therefore, mid-cap stocks may be more volatile than those of larger companies.
- *Small- and Micro-Capitalization Company Risk.* Generally, small- and micro-capitalization companies have more potential for rapid growth. They also often involve greater risk than larger companies, and these risks are passed on to the Fund. These smaller-capitalization companies may not have the management experience, financial resources, product diversification and competitive strengths of larger companies, and, therefore, their securities tend to be more volatile than the securities of larger, more established companies, making them less liquid than other securities.
- *High Portfolio Turnover Rate Risk.* The Fund may have a relatively high turnover rate compared to many registered funds. A high portfolio turnover rate (100% or more) has the potential to result in increased brokerage transaction costs which may lower the Fund's returns. Furthermore, a high portfolio turnover rate may result in the realization by the Fund, and distribution to shareholders, of a greater amount of capital gains, including short-term capital gains, than if the Fund had a low portfolio turnover rate. Distributions to shareholders of short-term capital gains are taxed as ordinary income under federal income tax laws. This could result in a higher tax liability and may lower an investor's after-tax return.
- *Cybersecurity Risk.* With the increased use of technologies such as the Internet to conduct business, the Fund is susceptible to operational, information security, and related risks. Cyber incidents affecting the Fund or its service providers may cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund's ability to calculate its NAV, impediments to trading, the inability of shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs.

Performance

The Fund is the successor to the Convergence Long/Short Equity Fund, a series of the Trust (the "Predecessor Fund"), as a result of the reorganization of the Predecessor Fund into the Fund on February 18, 2022 (the "Reorganization"). As a result of the Reorganization, the Fund adopted the financial and performance history of the Predecessor Fund. Accordingly, the performance shown in the bar chart and performance table for periods from January 1, 2013 to February 18, 2022, represents the performance of the Predecessor Fund, which operated as a mutual fund. The Predecessor Fund was also advised by the Adviser and had the same investment objective and substantially similar strategies as the Fund. Prior to the

Reorganization, the Fund had not yet commenced operations. Returns of the Fund will be different from returns of the Predecessor Fund because they have different expenses.

The performance information demonstrates the risks of investing in the Fund by showing changes in the Fund's (and the Predecessor Fund's) performance from year to year and by showing how the Fund's (and the Predecessor Fund's) average annual returns for the one-year, five-year and ten-year periods compare with those of a broad measure of market performance. Remember, the Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund's website at www.investcip.com or by calling the Fund toll-free at 877-677-9414.

Calendar Year Returns as of December 31

During the period shown in the bar chart, the best performance for the Fund for a quarter was 12.25% (for the quarter ended March 31, 2021). The worst performance for the Fund was -18.08% (for the quarter ended March 31, 2020).

Average Annual Total Returns (Periods Ended December 31, 2022)

	<u>One Year</u>	<u>Five Years</u>	<u>Ten Years</u>
Return Before Taxes	-7.24%	5.20%	9.51%
Return After Taxes on Distributions	-7.43%	2.40%	7.02%
Return After Taxes on Distributions and Sale of Fund Shares	-4.15%	3.39%	7.05%
Russell 3000® Total Return Index			
(reflects no deduction for fees, expenses or taxes)	-19.21%	8.79%	12.13%

Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are calculated using the historical highest individual federal marginal income tax rates in effect and do not reflect the effect of state and local taxes. The after-tax returns shown are not relevant to investors who hold their shares through tax-deferred or other tax-advantaged arrangements such as 401(k) plans or individual retirement accounts ("IRA").

In certain cases, the figure representing "Return After Taxes on Distributions and Sale of Fund Shares" may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax benefit to the investor.

Management

Investment Adviser

Convergence Investment Partners, LLC is the Fund's investment adviser.

Portfolio Managers

David J. Abitz, CFA, President and Chief Investment Officer of the Adviser, has served as a portfolio manager for the Fund since its inception in February 2022 and the Predecessor Fund since it commenced operations in December 2009. Mr. Justin Neuberg, CFA, has served as a portfolio manager for the Fund since its inception in February 2022 and the Predecessor Fund since March 2016. Mr. Abitz and Mr. Neuberg are jointly and primarily responsible for the day-to-day management of the Fund's investment portfolio.

Purchase and Sale of Shares

The Fund issues and redeems Shares at NAV only in large blocks known as "Creation Units," which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities closely approximating the holdings of the Fund (the "Deposit Securities") and/or a designated amount of U.S. cash.

Shares are listed on the Exchange, and individual Shares may only be purchased and sold in the secondary market through a broker or dealer at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the "bid" price) and the lowest price a seller is willing to accept for Shares (the "ask" price) when buying or selling Shares in the secondary market. This difference in bid and asked prices is often referred to as the "bid-ask spread".

Recent information about the Fund, including its NAV, market price, premiums and discounts, and bid-ask spreads, can also be found on the Fund's website at www.investcip.com.

Tax Information

The Fund's distributions will be taxed as ordinary income or long-term capital gains, unless you are investing through a tax-deferred or other tax-advantaged arrangement, such as a 401(k) plan or an IRA. You may be taxed later upon withdrawal of monies from tax-deferred arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (a "Financial Intermediary"), the Adviser or its affiliates may pay Financial Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Financial Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Shares. These payments may

create a conflict of interest by influencing the Financial Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Financial Intermediary's website for more information.

Investment Strategies, Related Risks and Disclosure of Portfolio Holdings

Investment Objective. The investment objective of the Fund is to seek long-term capital growth.

Principal Investment Strategies. The Fund seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its net assets (plus any borrowings for investment purposes) in long and short positions in equity securities of domestic companies. The Fund focuses primarily on companies with medium and large market capitalizations, although the Fund may establish long and short positions in companies of any market capitalization. The Fund generally considers companies with medium and large market capitalizations to be those companies that comprise the upper half of the Russell 3000[®] Total Return Index. As of December 31, 2022, the market capitalization range of the upper half of the Russell 3000[®] Total Return Index was between \$2,066.94 billion and \$2.03 billion. The Fund will hold long (purchase) securities that the Adviser believes will outperform the market, and will sell short securities expected to underperform the market.

The Fund intends to maintain a net long exposure (the market value of long positions minus the market value of short positions) of approximately 50% to 100% of the Fund's total assets. Under normal market conditions, the Fund's long positions may range from approximately 90% to 150% of the Fund's total assets and its short positions may range from approximately 20% to 70% of the Fund's total assets. With a long position, the Fund purchases a security outright, while with a short position, the Fund sells a security that it has borrowed. When the Fund sells a security short, it borrows the security from a third party and sells it at the then-current market price. The Fund is then obligated to buy the security on a later date so that it can return the security to the lender. Short positions may be used either to hedge long positions or may be used speculatively to seek positive returns in instances where the Adviser believes a security's price will decline. The Fund will either realize a profit or incur a loss from a short position, depending on whether the value of the underlying stock decreases or increases, respectively, between the time it is sold and when the Fund replaces the borrowed security. The Fund may reinvest the proceeds of its short sales by taking additional long positions, thus allowing the Fund to maintain long positions in excess of 100% of its net assets.

Investment Selection Process

In making investment decisions for the Fund, the Adviser utilizes a proprietary stock ranking process. This stock ranking process is based on the philosophy that fundamentally sound companies are rewarded while fundamentally inferior companies are punished. Additionally, this process was designed to capture the best attributes of both quantitative and fundamental methods. Unlike traditional fundamental stock picking, quantitative management allows for broader coverage and increased data utilization. The Adviser seeks to maximize return while minimizing the risk assumed by the Fund through a stock ranking process that measures what market participants are rewarding or punishing. The Adviser systematically measures both current factor exposures for company stocks and the market's factor preferences and tilts the Fund's investment portfolio towards stocks that are ranked highly by the Adviser from a fundamental perspective. The factors the Adviser evaluates as part of its stock ranking process include, but are not limited to, valuation, growth, momentum, and quality.

- Valuation factors help to identify stocks that appear inexpensive relative to other companies based on fundamental measures. The Adviser evaluates valuation factors such as price-to-value ratios, earnings, enterprise value, cash flow, revenues, and yield.
- Growth factors seek to identify stocks that exhibit signs of higher-than-average growth metrics. The Adviser evaluates growth factors such as the growth rates in company earnings, revenue, and cash flow, in addition to assessing the rate of change of these growth rates.

- Momentum factors quantify trends in both price and fundamentals. The Adviser evaluates momentum factors such as the strength and duration of stock price movements, as well as fundamental trends in a company's cash flow, earnings, and sales.
- Quality factors differentiate companies based on a variety of corporate health and stability measures. The Adviser evaluates quality factors such as the stability of a company's earnings and cash flow, the strength of the balance sheet, and profit margins.

The Adviser aggregates similar measures into factors and each measure is equally weighted. The Adviser's buy and sell decisions are primarily driven by this investment process. Applying these indicators, the Adviser takes long or short positions in stocks that it believes are favorably ranked.

General Investment Policies of the Fund

Change in Investment Objective and Strategies. The Fund's investment objective and principal investment strategies may be changed without the approval of the Fund's shareholders upon 60 days' written notice to shareholders. The Fund will not make any changes in its investment policy of investing at least 80% of net assets (plus borrowings for investment purposes) in long and short positions in equity securities of domestic companies without providing shareholders with at least 60 days' prior written notice of the change in its investment policy.

Non-Principal Investment Strategies; Securities Lending. The Fund may lend securities from its portfolio to brokers, dealers and financial institutions in order to increase the return on its portfolio, primarily through the receipt of borrowing fees and earnings on invested collateral. Any such loan must be continuously secured by collateral in cash or cash equivalents maintained on a current basis in an amount at least equal to the market value of the securities loaned by the Fund. During the time securities are on loan, the borrower will pay the Fund any accrued income on those securities, and the Fund may invest the cash collateral and earn income or receive an agreed-upon fee from a borrower that has delivered cash-equivalent collateral.

Non-Principal Investment Strategies; Investments in Foreign Securities. The Fund may invest in foreign companies, typically through the sale and purchase of American Depositary Receipts ("ADRs"). ADRs are certificates evidencing ownership of shares of a foreign-based issuer held by a U.S. bank or similar financial institution as depository. ADRs are denominated in U.S. dollars.

Temporary Strategies; Cash or Similar Investments. For temporary defensive purposes, the Adviser may invest up to 100% of the Fund's total assets in high-quality, short-term debt securities and money market instruments. These short-term debt securities and money market instruments include shares of mutual funds or ETFs, commercial paper, certificates of deposit, bankers' acceptances, U.S. Government securities and repurchase agreements. Taking a temporary defensive position may result in the Fund not achieving its investment objective. Furthermore, to the extent that the Fund invests in money market mutual funds for its cash position, there will be some duplication of expenses because the Fund would bear its pro rata portion of such money market funds' management fees and operational expenses.

Principal Risks of Investing in the Fund

Before investing in the Fund, you should carefully consider your own investment goals, the amount of time you are willing to leave your money invested, and the amount of risk you are willing to take. Remember, in addition to possibly not achieving your investment goals, **you could lose money by investing in the Fund.** The Fund's principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, unless stated otherwise, regardless of the order in which it appears. The principal risks of investing in the Fund are:

- *Cybersecurity Risk.* With the increased use of technologies such as the Internet to conduct business, the Fund is susceptible to operational, information security, and related risks. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber attacks include, but are not limited to, gaining unauthorized access to digital systems (*e.g.*, through “hacking” or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (*i.e.*, efforts to make network services unavailable to intended users). Cyber incidents affecting the Fund or its service providers have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund’s ability to calculate their NAV, impediments to trading, the inability of shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. Similar adverse consequences could result from cyber incidents affecting issuers of securities in which the Fund invests, counterparties with which the Fund engages in transactions, governmental and other regulatory authorities, exchange and other financial market operators, banks, brokers, dealers, insurance companies and other financial institutions (including financial intermediaries and service providers for shareholders) and other parties. In addition, substantial costs may be incurred in order to prevent any cyber incidents in the future. While the Fund’s service providers have established business continuity plans in the event of, and risk management systems to prevent, such cyber incidents, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. Furthermore, the Fund cannot control the cyber security plans and systems put in place by their service providers or any other third parties whose operations may affect the Fund or its shareholders. As a result, the Fund and its shareholders could be negatively impacted.

- *Common Stock Risk.* Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in, and perceptions of, their issuers change. These investor perceptions are based on various and unpredictable factors including: expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, economic and banking crises. Common stock, or common stock equivalents, of any given issuer, are generally exposed to greater risk than preferred stocks and debt obligations of the issuer because common stock, or equivalent interests, generally have inferior rights to receive payments from issuers in comparison with the rights of preferred stock, bonds and other creditors of such issuers.

- *ETF Risk.* The Fund is an ETF, and, as a result of an ETF’s structure, it is exposed to the following risks:
 - *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as Authorized Participants (“APs”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

 - *Cash Redemption Risk.* The Fund’s investment strategy may require it to redeem Shares for cash or to otherwise include cash as part of its redemption proceeds. The Fund may be required to sell or unwind portfolio investments to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to realize a capital gain that it might not have realized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used. To the extent that the transaction fees charged

- for redemptions of creation units is insufficient to cover the Fund's transaction costs of selling portfolio securities, the Fund's performance could be negatively impacted.
- *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
 - *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. As a result, investors in the Fund may pay significantly more or receive significantly less for Shares than the Fund's NAV. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant. Such conditions may also cause the bid/ask spreads for an ETF to widen.
 - *Trading.* Although Shares are listed for trading on the Exchange and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares. This could lead to an increase in the bid/ask spread for the Shares or the shares trading at a price that is higher or lower than the Fund's NAV.
 - *Foreign Securities Risk.* As a non-principal strategy, the Fund may invest in foreign securities, typically through the purchase and sale of ADRs, which are traded on U.S. exchanges and represent an ownership in a foreign security. Investing in foreign securities poses additional risks since political and economic events unique to a country or region will affect those markets and their issuers. Income earned on foreign securities may be subject to foreign withholding taxes. These risks will not necessarily affect the U.S. economy or similar issuers located in the United States. In addition, investments in foreign securities are generally denominated in a foreign currency. As a result, changes in the value of a currency compared to the U.S. dollar may affect (positively or negatively) the value of the Fund's investments. These currency movements may occur separately from, and in response to, events that do not otherwise affect the value of the security in the issuer's home country. While ADRs provide an alternative to directly purchasing the underlying foreign securities in their respective national markets and currencies, investments in ADRs continue to be subject to many of the risks associated with investing directly in foreign securities.
 - *General Market Risk.* The market value of a security may move up or down, sometimes rapidly and unpredictably. These fluctuations may cause a security to be worth less than the price originally paid for it, or less than it was worth at an earlier time. Market risk may affect a single issuer, industry, or sector of the economy or the market as a whole. Global economies and financial markets are increasingly interconnected, which increases the probabilities that conditions in one country or region might adversely impact issues in a different country or region. In some cases, the stock prices of individual companies have been negatively impacted even though there may be little or no apparent degradation in the financial condition or prospects of that company. As a result of this volatility, many of the following risks associated with an investment in the Fund may be increased. Continuing market problems may have adverse effects on the Fund. Political and diplomatic events within the U.S. may affect investor and consumer confidence and may adversely impact financial markets and the broader economy.

Additionally, geopolitical conflicts, continue to be ongoing risks to future growth. Markets may react strongly to changes in these policies, which could increase volatility.

- *High Portfolio Turnover Rate Risk.* High portfolio turnover rates could generate capital gains, including short-term capital gains taxable to shareholders at ordinary income rates and could increase brokerage commission costs. To the extent that the Fund experiences an increase in brokerage commissions due to a higher turnover rate, the performance of the Fund could be negatively impacted by the increased expenses incurred by the Fund. These potentially higher taxes and increased brokerage commission costs may reduce a shareholder's after-tax return on an investment in the Fund.
- *Large-Capitalization Company Risk.* Larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in consumer tastes or innovative smaller competitors. Also, large-capitalization companies are sometimes unable to attain the high growth rates of successful, smaller companies, especially during extended periods of economic expansion.
- *Management Risk.* The ability of the Fund to meet its investment objective is directly related to the Adviser's investment strategies for the Fund. The value of your investment in the Fund may vary with the effectiveness of the Adviser's research, analysis and asset allocation among portfolio securities. If the Adviser's investment strategies do not produce the expected results, your investment could be diminished or even lost.
- *Medium-Capitalization Company Risk.* The medium-capitalization companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, these mid-sized companies may pose additional risks, including liquidity risk, because these companies tend to have limited product lines, markets and financial resources, and may depend upon a relatively small management group. Therefore, mid-cap stocks may be more volatile than those of larger companies. These securities may be traded over-the-counter or listed on an exchange.
- *Recent Market Events Risk.* U.S. and international markets have experienced significant periods of volatility in recent months and years due to a number of economic, political and global macro factors including rising inflation and the impact of the coronavirus (COVID-19) as a global pandemic, uncertainties regarding interest rates, rising inflation, trade tensions, and the threat of tariffs imposed by the U.S. and other countries. The recovery from COVID-19 is proceeding at slower than expected rates and may last for a prolonged period of time. As a result of continuing political tensions and armed conflicts, including the war between Ukraine and Russia, the U.S. and the European Union imposed sanctions on certain Russian individuals and companies, including certain financial institutions, and have limited certain exports and imports to and from Russia. The war has contributed to recent market volatility and may continue to do so. Continuing market volatility as a result of recent market conditions or other events may have an adverse effect on the performance of the Fund.
- *Securities Lending Risk.* The Fund may lend securities from its portfolio as a non-principal strategy. Securities lending involves the risk of a default or insolvency of the borrower. In either of these cases, the Fund could experience delays in recovering securities or collateral or could lose all or part of the value of the loaned securities. The Fund also could lose money in the event of a decline in the value of the collateral provided for loaned securities. Additionally, the loaned portfolio securities may not be available to the Fund on a timely basis and the Fund may therefore lose the opportunity to sell the securities at a desirable price. Any decline in the value of a security that occurs while the security is out on loan would continue to be borne by the Fund.
- *Short Sales Risk.* Short sales are transactions in which the Fund sells a security it does not own. The Fund must borrow the security to make delivery to the buyer. The Fund is then obligated to replace the security borrowed by purchasing the security at the market price at the time of replacement. The price at

such time may be higher or lower than the price at which the security was sold by the Fund. If the underlying security goes down in price between the time the Fund sells the security and buys it back, the Fund will realize a gain on the transaction. Conversely, if the underlying security goes up in price during the period, the Fund will realize a loss on the transaction. Because the market price of the security sold short could increase without limit, the Fund could be subject to a theoretically unlimited loss. The risk of such price increases is the principal risk of engaging in short sales. In addition, the Fund's investment performance may suffer if the Fund is required to close out a short position earlier than it had intended. This would occur if the securities lender required the Fund to deliver the securities the Fund borrowed at the commencement of the short sale and the Fund was unable to borrow the securities from another securities lender or otherwise obtain the security by other means or if the borrowed securities appreciated in value from the date that the Fund first borrowed them. Moreover, the Fund may be subject to expenses related to short sales that are not typically associated with investing in securities directly, such as costs of borrowing and margin account maintenance costs associated with the Fund's open short positions. These expenses negatively impact the performance of the Fund. For example, when the Fund short sells an equity security that pays a dividend, it is obligated to pay the dividend on the security it has sold. However, a dividend paid on a security sold short generally reduces the market value of the shorted security and thus, increases the Fund's unrealized gain or reduces the Fund's unrealized loss on its short sale transaction. To the extent that the dividend that the Fund is obligated to pay is greater than the return earned by the Fund on investments, the performance of the Fund will be negatively impacted. Furthermore, the Fund may be required to pay a premium or interest to the lender of the security. The foregoing types of short sale expenses are sometimes referred to as the "negative cost of carry," and will tend to cause the Fund to lose money on a short sale even in instances where the price of the underlying security sold short does not change over the duration of the short sale. The Fund is also required to segregate other assets on its books to cover its obligation to return the security to the lender which means that those other assets may not be available to meet the Fund's needs for immediate cash or other liquidity.

- *Small- and Micro-Capitalization Company Risk.* Generally, small- and micro-capitalization companies have more potential for rapid growth. They also often involve greater risk than larger companies, and these risks are passed on to the Fund. These smaller-capitalization companies may not have the management experience, financial resources, product diversification and competitive strengths of larger companies, and, therefore, their securities tend to be more volatile than the securities of larger, more established companies, making them less liquid than other securities. Small-cap company stocks tend to be bought and sold less often and in smaller amounts than larger company stocks. Because of this, if the Fund wants to sell a large quantity of a small-cap company's stock, it may have to sell at a lower price than the Adviser might prefer, or it may have to sell in smaller than desired quantities over a period of time. Given these risks, an investment in the Fund may be more suitable for long-term investors who are willing to bear the risk of these fluctuations.

Portfolio Holdings Information

Information about the Fund's daily portfolio holdings is available at www.investcip.com. A complete description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Statement of Additional Information ("SAI").

Management of the Fund

The Adviser

The Fund has entered into an investment advisory agreement (the "Advisory Agreement") with Convergence Investment Partners, LLC, a Delaware limited liability company located at 3801 PGA Boulevard, Suite 1001, Palm Beach Gardens, Florida 33410. For the services it provides the Fund, the Fund pays the Adviser a

unitary management fee at an annual rate of 0.95% of the Fund's average daily net assets. Under the Advisory Agreement, the Adviser manages the Fund's investments subject to the supervision of the Trust's Board of Trustees (the "Board"). Prior to the Reorganization, the Adviser entered into an advisory agreement with the Trust, on behalf of the Predecessor Fund, pursuant to which the Predecessor Fund paid the Adviser 1.00% of the Fund's average daily net assets. The management fee paid by the Predecessor Fund was not a unitary management fee. For the fiscal year ended November 30, 2022, the Adviser received management fees of 0.76% (net of fee waivers) of the Fund's average daily net assets, which includes fees paid by the Predecessor Fund until the effective date of the Reorganization on February 18, 2022. Under the Advisory Agreement, the Adviser has agreed to pay all expenses of the Fund except interest charges on any borrowings, dividends, and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act, and the unitary management fee payable to the Adviser.

The Adviser is a registered investment adviser founded in November 2004 as QIS Advisors, LLC ("QIS Advisors"). On December 16, 2008, the name of the Adviser was changed to Mariner Quantitative Solutions, LLC. On January 27, 2011, the name of the Adviser was changed to Convergence Investment Partners, LLC. Since February 2005, the Adviser has managed separate accounts and other pooled investment vehicles using a long/short investment strategy similar to the strategy implemented with the Fund. As of December 31, 2022, the Adviser had approximately \$203 million in assets under management. The Adviser is majority-owned by Nile Capital Group, LLC, a Delaware limited liability company.

A discussion regarding the basis of the Board's approval of the Advisory Agreement is included in the Fund's [Semi-Annual Report](#) for the period ended May 31, 2022.

The Fund, as a series of the Trust, does not hold itself out as related to any other series of the Trust for purposes of investment and investor services, nor does it share the same investment adviser with any other series of the Trust.

Portfolio Managers

Mr. David J. Abitz and Mr. Justin Neuberg are each a portfolio manager of the Fund and are jointly and primarily responsible for the day-to-day management of the Fund's investment portfolio.

David J. Abitz, CFA, founded QIS Advisors, the predecessor firm to the Adviser, in 2004. Mr. Abitz has more than two decades of investment experience and is the President and Chief Investment Officer of the Adviser. Prior to founding the Adviser, Mr. Abitz was Chief Investment Officer of the Custom Quantitative Solutions Group at M&I Investment Management Corporation from 2000 to 2004, where he managed the Marshall Equity Income Fund, Tax Efficient Portfolios, M&I High Dividend Income Portfolios and the M&I Long/Short Fund. Mr. Abitz began his career at M&I Investment Management Corporation as a fundamental equity research analyst and an equity trader. Mr. Abitz is a Chartered Financial Analyst with a BBA in Finance from the University of Wisconsin – Oshkosh and an MBA from the University of Wisconsin – Madison. He is a member of the Society of Quantitative Analysts, the Chicago Quantitative Alliance group, and the Chartered Financial Analyst ("CFA") Society of South Florida.

Justin Neuberg, CFA, Portfolio Manager, joined the Adviser in 2014. Mr. Neuberg has worked in the financial services industry since 2002 and has an extensive background in investment analytics. Prior to joining the firm, Mr. Neuberg was an analyst and portfolio strategist at Mariner Wealth Advisors from 2009 to 2013, where he was a member of the Mariner Assets Allocation Committee. Mr. Neuberg has a bachelor's degree in physics from the University of Virginia and a Master of Business Administration degree with a concentration in finance from Georgetown University. Mr. Neuberg is a Chartered Financial Analyst with a

professional certificate in finance from the University of California at San Diego. Mr. Neuberg is a member of the CFA Society of South Florida.

CFA[®] and Chartered Financial Analyst[®] are registered trademarks owned by the CFA Institute.

The SAI provides additional information about the Portfolio Managers' compensation, other accounts managed and ownership of securities in the Fund.

Shareholder Information

How to Buy & Sell Shares

The Fund issues and redeems Shares at net asset value (“NAV”) only in Creation Units. Only APs may acquire Shares directly from the Fund, and only APs may tender their Shares for redemption directly to the Fund, at NAV. APs must be a member or participant of a clearing agency registered with the SEC and must execute a Participant Agreement that has been agreed to by Foreside Fund Services, LLC (the “Distributor”), the Fund’s distributor, and that has been accepted by the Fund’s transfer agent, with respect to purchases and redemptions of Creation Units. Once created, Shares trade in the secondary market in quantities less than a Creation Unit.

Most investors buy and sell individual Shares in secondary market transactions through brokers. Shares are listed for trading on the secondary market on the Exchange and can be bought and sold throughout the trading day like other publicly traded securities. In addition, because secondary market transactions occur at market prices, you may pay more than NAV when you buy Shares, and receive less than NAV when you sell those Shares.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offer price in the secondary market on each leg of a round trip (purchase and sale) transaction. The commission is frequently a fixed amount and may be a significant proportional cost for investors seeking to buy or sell small amounts of shares. The spread with respect to shares of the Fund varies over time based on the Fund’s trading volume and market liquidity and is generally lower if the Fund has a lot of trading volume and market liquidity and higher if the Fund has little trading volume and market liquidity.

Because of the costs of buying and selling Fund shares, frequent trading may reduce investment return and an investment in the Fund may not be advisable for investors who anticipate regularly making small investments.

Book Entry

Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”) or its nominee is the record owner of all outstanding Shares.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. DTC’s participants include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book entry or “street name” through your brokerage account.

Frequent Purchases and Redemptions of Shares

The Fund imposes no restrictions on the frequency of purchases and redemptions of Shares. In determining not to adopt a written policy restricting frequent trading in the Fund, the Board evaluated the risks of market timing activities by Fund shareholders. Purchases and redemptions by APs, who are the only parties that may purchase or redeem Shares directly with the Fund, are an essential part of the ETF process and help keep Share trading prices in line with NAV. As such, the Fund accommodates frequent purchases and redemptions by APs. However, frequent purchases and redemptions for cash may increase portfolio transaction costs and may lead to the realization of capital gains. To minimize these potential consequences of frequent purchases and redemptions, the Fund employs fair value pricing and may impose transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Fund in effecting trades. In addition, the Fund and the Adviser reserve the right to reject any purchase order at any time.

Determination of Net Asset Value

The Fund's NAV is calculated by dividing the value of the Fund's total assets, less its liabilities, by the number of its shares outstanding. In calculating the Fund's NAV, portfolio securities are valued using current market values or official closing prices, if available. If such information is not available for a security held by the Fund or is determined to be unreliable, the security will be valued at fair value estimates under guidelines established by the Board (as described below). The Fund's NAV is calculated at the close of regular trading of the NYSE (which is generally 4:00 p.m., Eastern time). The Fund's NAV will not be calculated on days on which the NYSE is closed for trading. If the NYSE closes early, the Fund will calculate its NAV as of the close of trading on the NYSE on that day. If an emergency exists as permitted by the SEC, the NAV may be calculated at a different time.

Fair Value Pricing

When market quotations are not readily available or deemed unreliable, a security or other asset, is valued at its fair value in accordance with Rule 2a-5 under the 1940 Act as determined under the Adviser's fair value policy procedures, subject to oversight by the Board. For example, such circumstances may arise when: (i) a security has been de-listed or has had its trading halted or suspended; (ii) a security's primary pricing source is unable or unwilling to provide a price; (iii) a security's primary trading market is closed during regular market hours; or (iv) a security's value is materially affected by events occurring after the close of the security's primary trading market. Generally, when fair valuing a security, the Fund will take into account all reasonably available information that may be relevant to a particular valuation including, but not limited to, fundamental analytical data regarding the issuer, information relating to the issuer's business, recent trades or offers of the security, general and/or specific market conditions and the specific facts giving rise to the need to fair value the security. Fair value determinations are made in good faith and in accordance with the fair value methodologies included in the Board-adopted valuation procedures. Due to the subjective and variable nature of fair value pricing, there can be no assurance that the Adviser will be able to obtain the fair value assigned to the security upon the sale of such security.

Dividends, Distributions, and Taxes

Dividends and Distributions

The Fund intends to make distributions of net investment income and net capital gain, if any, at least annually, typically during the month of December. The Fund will declare and pay income and capital gain distributions in cash. Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

Taxes

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in the Fund. Your investment in the Fund may have other tax implications. Please consult your tax advisor about the tax consequences of an investment in Shares, including the possible application of foreign, state, and local tax laws.

The Fund intends to qualify each year for treatment as a regulated investment company (“RIC”) under Subchapter M of the Internal Revenue Code of 1986, as amended. If it meets certain minimum distribution requirements, a RIC is not subject to federal income tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, the Fund’s failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Unless your investment in Shares is made through a tax-exempt entity or tax-advantaged account, such as an IRA plan, you need to be aware of the possible tax consequences when the Fund makes distributions, when you sell your Shares listed on the Exchange, and when you purchase or redeem Creation Units (institutional investors only).

Taxes on Purchases and Redemptions of Creation Units

An AP having the U.S. dollar as its functional currency for U.S. federal income tax purposes who exchanges securities for Creation Units generally recognizes a gain or a loss. The gain or loss will be equal to the difference between the value of the Creation Units at the time of the exchange and the exchanging AP’s aggregate basis in the securities delivered plus the amount of any cash paid for the Creation Units. An AP who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanging AP’s basis in the Creation Units and the aggregate U.S. dollar market value of the securities received, plus any cash received for such Creation Units. The IRS may assert, however, that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing “wash sales” (for an AP who does not mark-to-market their holdings) or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if Shares have been held for more than one year and as a short-term capital gain or loss if Shares have been held for one year or less.

The Fund may include a payment of cash in addition to, or in place of, the delivery of a basket of securities upon the redemption of Creation Units. The Fund may sell portfolio securities to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to realize investment income and/or capital gains or losses that it might not have realized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment in the proceeds paid upon the redemption of Creation Units.

Taxes on Distributions

For federal income tax purposes, distributions of net investment income are generally taxable as ordinary income or qualified dividend income. A portion of dividends received from the Fund (but none of the Fund’s capital gain distributions) may qualify for the dividends-received deduction for corporations. Taxes on distributions of net capital gains (if any) are determined by how long the Fund owned the investments that generated them, rather than how long a shareholder has owned his or her Shares. Sales of assets held by the

Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions of the Fund's net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are reported to shareholders by the Fund as capital gain dividends ("Capital Gain Dividends") will be taxable as long-term capital gains, which for non-corporate shareholders are subject to tax at reduced rates of up to 20% (lower rates apply to individuals in lower tax brackets). Distributions of short-term capital gain will generally be taxable as ordinary income. Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional Shares.

Distributions reported by the Fund as "qualified dividend income" are generally taxed to non-corporate shareholders at rates applicable to long-term capital gains, provided holding period and other requirements are met. "Qualified dividend income" generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive from the Fund that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations.

Shortly after the close of each calendar year, you will be informed of the character of any distributions received from the Fund.

In addition to the federal income tax, certain individuals, trusts and estates may be subject to a Net Investment Income ("NII") tax of 3.8%. The NII tax is imposed on the lesser of: (i) the taxpayer's investment income, net of deductions properly allocable to such income; or (ii) the amount by which the taxpayer's modified adjusted gross income exceeds certain thresholds (\$250,000 for married individuals filing jointly, \$200,000 for unmarried individuals and \$125,000 for married individuals filing separately). The Fund's distributions are includable in a shareholder's investment income for purposes of this NII tax. In addition, any capital gain realized by a shareholder upon a sale or redemption of Fund shares is includable in such shareholder's investment income for purposes of this NII tax.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable even if they are paid from income or gains earned by the Fund before your investment (and thus were included in the Shares' NAV when you purchased your Shares).

You may wish to avoid investing in the Fund shortly before a dividend or other distribution, because such a distribution will generally be taxable even though it may economically represent a return of a portion of your investment.

If you are neither a resident nor a citizen of the United States or if you are a foreign entity, distributions (other than Capital Gain Dividends) paid to you by the Fund will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met.

Under the Foreign Account Tax Compliance Act ("FATCA"), the Fund may be required to withhold a generally nonrefundable 30% tax on (i) distributions of investment company taxable income and (ii) distributions of net capital gain and the gross proceeds of a sale or redemption of Fund shares paid to (A) certain "foreign financial institutions" unless such foreign financial institution agrees to verify, monitor, and report to the IRS the identity of certain of its account holders, among other items (or unless such entity is otherwise deemed compliant under the terms of an intergovernmental agreement between the United States

and the foreign financial institution's country of residence), and (B) certain "non-financial foreign entities" unless such entity certifies to the Fund that it does not have any substantial U.S. owners or provides the name, address, and taxpayer identification number of each substantial U.S. owner, among other items. In December 2018, the IRS and Treasury Department released proposed Treasury Regulations that would eliminate FATCA withholding on Fund distributions of net capital gain and the gross proceeds from a sale or redemption of Fund shares. Although taxpayers are entitled to rely on these proposed Treasury Regulations until final Treasury Regulations are issued, these proposed Treasury Regulations have not been finalized, may not be finalized in their proposed form, and are potentially subject to change. This FATCA withholding tax could also affect the Fund's return on its investments in foreign securities or affect a shareholder's return if the shareholder holds its Fund shares through a foreign intermediary. You are urged to consult your tax adviser regarding the application of this FATCA withholding tax to your investment in the Fund and the potential certification, compliance, due diligence, reporting, and withholding obligations to which you may become subject in order to avoid this withholding tax.

The Fund or a financial intermediary, such as a broker, through which a shareholder owns Shares) generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has underreported dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding.

Taxes When Shares are Sold on the Exchange

Any capital gain or loss realized upon a sale of Shares generally is treated as a long-term capital gain or loss if Shares have been held for more than one year and as a short-term capital gain or loss if Shares have been held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent of Capital Gain Dividends paid with respect to such Shares and disallowed to the extent of the amount of exempt-interest dividends received by the shareholder with respect to such Shares. The ability to deduct capital losses may be limited.

Tax Considerations

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to state and local tax on Fund distributions and sales of Shares.

Consult your personal tax advisor about the potential tax consequences of an investment in Shares under all applicable tax laws. For more information, please see the section entitled "Federal Income Tax Matters" in the SAI.

Premium/Discount Information

Information regarding how often Shares are traded on the Exchange at a price above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund can be found on the Fund's website at www.investcip.com.

Additional Notices

Shares are not sponsored, endorsed, or promoted by the Exchange. The Exchange is not responsible for, nor has it participated in the determination of, the timing, prices, or quantities of Shares to be issued, nor in the determination or calculation of the equation by which Shares are redeemable. The Exchange has no obligation or liability to owners of Shares in connection with the administration, marketing, or trading of Shares.

Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Adviser and the Fund make no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly.

Derivative Actions

Pursuant to the Trust's Amended and Restated Declaration of Trust (the "Declaration of Trust"), and subject to the limitations disclosed in the Declaration of Trust, a Fund shareholder may only bring a derivative action if (i) the shareholder or shareholders make a pre-suit demand upon the Board to bring the subject action unless an effort to cause the Board to bring such an action is not likely to succeed (as defined in the Declaration of Trust); (ii) shareholders eligible to bring such derivative action under the Delaware Statutory Trust Act who hold at least 10% of the outstanding voting securities of the Trust, or 10% of the outstanding voting securities of the series or class to which such action relates, shall join in the request for the Board to commence such action; and (iii) the Board is afforded a reasonable amount of time to consider such shareholder request and to investigate the basis of such claim. The Board shall be entitled to retain counsel or other advisors in considering the merits of the request and shall require an undertaking by the shareholders making such request to reimburse the Trust for the expense of any such advisors in the event that the Trustees determine not to bring such action. The provision requiring at least 10% of the outstanding voting securities of the Trust, applicable series or class to join in the request to bring the derivative action and the provision requiring an undertaking by the requesting shareholders to reimburse the Trust for the expense of any advisors retained by the Board in the event that the Trustees determine not to bring such action, do not apply to claims brought under federal securities laws.

Financial Highlights

On February 18, 2022, the Fund acquired all of the assets and liabilities of the Predecessor Fund in exchange for shares of beneficial interest of the Fund. As a result of such reorganization, the Fund adopted the financial and performance history of the Predecessor Fund.

The financial highlights table below is intended to help you understand the Fund's (and Predecessor Funds) financial performance information for the Fund's (and Predecessor Fund's) five most recent fiscal years. The financial highlights for the Fund include the historical financial highlights of the Predecessor Fund for the periods prior to February 18, 2022. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that you would have earned or lost on an investment in the Fund (and Predecessor Fund) (assuming you reinvested all distributions). This information has been audited by Cohen & Company, Ltd., the independent registered public accounting firm of the Fund, whose report, along with the Fund's financial statements, are included in the Fund's 2022 [Annual Report](#) to Shareholders, which is available free of charge upon request.

Total Return on Market Price⁽⁴⁾	2.20 %	— %	— %	— %	— %
Supplemental Data and Ratios:					
Net assets at end of year (000's)	\$24,375	\$29,313	\$22,537	\$67,741	\$112,861
Ratio of expenses to average net assets:					
Before waiver, expense reimbursement and recoupments ⁽³⁾	1.58 %	2.56 %	2.58 %	2.18 %	2.20 %
After waiver, expense reimbursement and recoupments ⁽³⁾	1.38 %	2.11 %	2.39 %	2.18 %	2.20 %
Ratio of net investment income (loss) to average net assets:					
Before waiver, expense reimbursement and recoupments	0.26 %	(0.63)%	(0.13)%	0.76 %	0.03 %
After waiver, expense reimbursement and recoupments	0.46 %	(0.18)%	0.06 %	0.76 %	0.03 %
Portfolio turnover rate	244.44 % ⁽⁵⁾	303.76 %	251.72 %	239.08 %	193.55 %

(1) Per share net investment income was calculated using the daily average shares outstanding method.

(2) Total return on net asset value (NAV) represents the rate that the investor would have earned or lost on an investment in the Fund, assuming reinvestment of dividends.

(3) The ratio of expenses to average net assets includes dividends on short positions, interest and broker expenses. The annualized before waiver, expense reimbursement and recoupments and after waiver, expense reimbursement and recoupments ratios excluding dividends on short positions, interest and broker expenses were 1.28% and 1.08%, 1.95% and 1.50%, 1.69% and 1.50%, 1.32% and 1.32%, 1.27% and 1.27% for the years ended November 30, 2022, November 30, 2021, November 30, 2020, November 30, 2019, November 30, 2018, respectively.

(4) Total return on market price is calculated assuming an initial investment made at the market price on the first day of the period, reinvestment of dividends and distributions at market price during the period and redemption at market price on the last day of the period.

(5) Excludes the impact of in-kind transactions.

⁽⁶⁾ The Fund converted from a mutual fund to an ETF pursuant to an Agreement and Plan of Reorganization on February 18, 2022. See Note 1 in the Notes to Financial Statements of the Fund's Annual Report for additional information about the Reorganization.

Statement of Additional Information

The Fund's SAI provides additional details about the investments and techniques of the Fund and certain other additional information. A current SAI is on file with the SEC and is incorporated into this Prospectus by reference. This means that the Fund's SAI is legally considered a part of this Prospectus even though it is not physically within this Prospectus.

Annual and Semi-Annual Reports

The Fund's annual and semi-annual reports provide the most recent financial reports and portfolio holdings. The Fund's annual report contains a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during the Fund's prior fiscal year.

You can obtain a free copy of these documents, request other information, or make general inquiries about the Fund by calling the Fund (toll-free) at 877-677-9414, by visiting the Fund's website at www.investcip.com, or by writing to:
